DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups I-III, claim(s), 1-26, drawn to a method of identifying TGB-3 viral sequences which inhibit viral infection, a genetically modified TGB-3 viral sequence and a vector containing said sequence, and a method of inducing viral resistance in a plant using a modified TGB-3 viral sequence, wherein Group I corresponds to SEQ ID NO: 1, Group II corresponds to SEQ ID NO: 3 and Group III corresponds to SEQ ID NO: 5, and a transgenic plant or cell that is resistant to a virus.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is the specific sequence set forth as SEQ ID NO: 1, which has a specific mutation that confers an ability to inhibit viral infection, and thus the ability to induce viral resistance in a plant.

The special technical feature of Group II is the specific sequence set forth as SEQ ID NO: 3. This special technical feature is different from the special technical feature of Group I because SEQ ID NO: 3 has a specific mutation that is different from the mutation present in SEQ ID NO: 1, therefore there is a different structure-function relationship as it concerns SEQ ID NO: 3.

The special technical feature of Group III is the specific sequence set forth as SEQ ID NO: 5, which has a specific mutation that is different from the mutation present in SEQ ID NO: 1. This special technical feature is different from the special technical feature of Group I because SEQ ID NO: 5 has a specific mutation that is different from the mutation present in SEQ ID NO: 1, therefore there is a different structure-function relationship as it concerns SEQ ID NO: 5.

Art Unit: 1636

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Lambertson whose telephone number is (703) 308-8365. The examiner can normally be reached on 8 am to 4:30 pm.
